

Xagle For You

Industry Use: Case Overview

For business owners & founders

- Centralize financials, client data, and team tracking in one platform.
- Save time with automation, templates, and integrated payments.
- Gain visibility into every aspect of the business without juggling multiple tools.
- Use built-in reports to inform decisions, spot trends, and stay ahead.

For service providers & freelancers

- Send quotes, accept payments, and manage tasks all from one dashboard.
- Keep projects and communication organized by client or job.
- Offer client portals to share documents, timelines, and updates.
- Bill accurately with tracked time logs and service-based invoicing.

For agencies & studios

- Collaborate with internal and external team members securely.
- Track performance across multiple clients or departments.
- Use customizable workflows to reflect unique service offerings.
- Monitor profitability, time allocation, and resource use with visual reports.

For coaches & consultants

- Bookkeeping and CRM tools in one space—ideal for solo or small teams.
- Maintain detailed client notes, goals, and communications.
- Build credibility and consistency with branded quotes and invoices.
- Share updates or deliverables securely through the client portal.

For
bookkeepers
& financial
professionals

- Simplify reconciliation with accurate, real-time data entry.
- Keep client communications, billing records, and reports centralized.
- Offer better insights to clients with accessible dashboards and exports.
- Customize access levels for clients or team members working on accounts.

For teams &
staff
members

- Assign tasks, track time, and manage deliverables with clear accountability.
- Keep all project materials and updates under one roof.
- Use dashboards to stay informed without micromanagement.
- Communicate internally and externally through integrated email and notes.
